Special Issue

Environmental Monitoring for Genotoxicity with Plant Systems

edited by Frederick J. de Serres

Preface

Higher plants as effective monitors of environmental mutagens
F.J. de Serres (USA) 1

Tradescantia stamen-hair system as an excellent botanical tester of mutagenicity: its responses to ionizing radiations and chemical mutagens, and some synergistic effects found
S. Ichikawa (Japan) 3

Tradescantia stamen-hair mutation bioassay on the mutagenicity of radioisotope-contaminated air following the Chernobyl nuclear accident and one year later
A. Cebulska-Wasilewska (Poland) 23

Synergistic effect between tannic acid and X-rays detected by the Tradescantia-micronucleus assay
S. Knasmuller, T.-W. Kim and T.-H. Ma (Austria, USA) 31

Proficiency of the Tradescantia-micronucleus image analysis system for scoring micronucleus frequencies and data analysis
T.-H. Ma, J. Xu, W. Xia, X. Jong, W. Sun and G. Lin (USA, China) 39

Tradescantia-micronucleus (Trad-MCN) bioassay on clastogenicity of wastewater and in situ monitoring
E.F. Ruiz, V.M.E. Rabago, S.U. Lecona, A.B. Perez and T.-H. Ma (Mexico, USA) 45

The use of Tradescantia and *Vicia faba* bioassays for the in situ detection of mutagens in an aquatic environment
W.F. Grant, H.G. Lee, D.M. Logan and M.F. Salamone (Canada) 53

Application of the Tradescantia micronucleus assay for the genetic evaluation of chemical mixtures in soil and aqueous media
B.S. Gill and S.S. Sandhu (USA) 65

Synergistic and antagonistic effects on genotoxicity of chemicals commonly found in hazardous waste sites
T.-H. Ma, S.S. Sandhu, Y. Peng, T.D. Chen and T.-w. Kim (USA) 71

Application of a wheat seedling assay for detecting aneuploidy induced by *N*-ethyl-*N*-nitrosourea and 4-nitroquinoline-1-oxide
J.S. Dhesi and S.S. Sandhu (USA) 79

[*end of special issue*]

Research Papers

Genotoxicities of nitropyrenes and their modulation by apigenin, tannic acid, ellagic acid and indole-3-carbinol in the Salmonella and CHO systems
M.-L. Kuo, K.-C. Lee and J.-K. Lin (Taiwan) 87

Bombesin impairs spindle function in mitotic V79 Chinese hamster cells by a receptor-dependent mechanism
A. Önfelt (Sweden) 97

The load of genetic and partially genetic disease in man. IV. Severe visual handicaps and profound childhood deafness in Hungarian school-age children
A. Czeizel, K. Skirpeczky, E. Mester and K. Sankaranarayanan (Hungary, Netherlands) 103

DNA base sequence changes in spontaneous and ethyl methanesulfonate-induced mutations of a chromosomally-integrated gene in Chinese hamster ovary cells
C.R. Ashman (USA) 115

Sister-chromatid exchange in highly purified human CD_4^+ and CD_8^+ lymphocytes
C. Sarri, C.N. Baxevanis, G.B. Côté, G.J. Reclos, E. Sarafidou, T. Spanos, M. Papanastasiou, M. Grigoriadou and M. Papamichail (Greece) 125

Mutagenic DNA repair in *Escherichia coli* XXI. A stable SOS-inducing signal persisting after excision repair of ultraviolet damage
B.A. Bridges and G.M. Brown (UK) 135

Effect of plasmid pKM101 in ultraviolet irradiated *uvr*$^+$ and *uvr*$^-$ *Escherichia coli*
V. Slezáriková, M. Sedliaková, I.V. Andreeva, O.Y. Rusina and A.G. Skavronskaya (Czechoslovakia, Russian Federation) 145

Formaldehyde, glyoxal, urethane, methyl carbamate, 2,3-butanedione, 2,3-hexanedione, ethyl acrylate, dibromoacetonitrile and 2-hydroxypropionitrile induce chromosome loss in *Saccharomyces cerevisiae*
F.K. Zimmermann and A. Mohr (Germany) 151

Effects of an inhibitor and a mimic of superoxide dismutase on bleomycin mutagenesis in Chinese hamster ovary cells
J. An and A.W. Hsie (USA) 167

Mitomycin C, 4-nitroquinoline-1-oxide and ethyl methanesulfonate induce long-lived lesions in DNA which result in SCEs during successive cell cycles in human lymphocytes
P. Daza, P. Escalza, S. Mateos and F. Cortés (Spain) 177

Cell cycle effects of the DNA topoisomerase inhibitors camptothecin and m-AMSA in lymphoblastoid cell lines from patients with Fanconi anemia
M. Poot, B. Epe and H. Hoehn (Germany) 185

Persistently elevated frequency of spontaneous mutations in progeny of CHO clones surviving X-irradiation: association with delayed reproductive death phenotype
W.P. Chang and J.B. Little (USA) 191

In vitro mammalian mutagenesis as a model for genetic lesions in human cancer
J. Hozier, M. Applegate and M.M. Moore (USA) 201

Effects of progesterone and estradiol on the proliferation of phytohemagglutinin-stimulated human lymphocytes
L.A. Herrera, R. Montero, J.M. León-Cázares, E. Rojas, M.E. Gonsebatt and P. Ostrosky-Wegman (Mexico) 211

An *Escherichia coli* plasmid-based, mutational system in which *supF* mutants are selectable: Insertion elements dominate the spontaneous spectra
H. Rodriguez, E.T. Snow, U. Bhat and E.L. Loechler (USA) 219
